Typeface Setup Checklist

Architecture Portfolio Studio · Class 07 · Kent State University

Check off each item as you build the system in class. Every item ties to a slide from tonight's lecture.

1 · Choose a Category

- [ ] Category named: Modernist, Humanist & Contemporary, Editorial & Stylistic, or Functional & Display
- [ ] One sentence written: what the project argues, and why this category fits it
- [ ] Candidate set in a paragraph of your own project text before you commit

2 · Build the Pairing

- [ ] One heading face and one body face chosen
- [ ] Three families at most across the whole file
- [ ] Heading and body contrast on purpose (serif with sans-serif, or two clearly different weights)
- [ ] Fonts installed (Adobe Fonts, or the free Google Fonts alternative)

3 · Update the Paragraph Styles

- [ ] Title style set in the heading face (24 to 48 pt)
- [ ] Subtitle style set in the heading face (14 to 20 pt)
- [ ] Body Text style set in the body face, 10 pt on 12 pt leading (9 to 11 pt range)
- [ ] Caption style set in the body face (7 to 8 pt)
- [ ] Body Text: Align to Grid set to All Lines

4 · Apply and Test on One Spread

- [ ] Styles applied to one spread of your project, with no hand-formatting on the text frames
- [ ] Hierarchy readable from across the room: title and body clearly different
- [ ] Body text sits on the baseline grid with no drift between lines
- [ ] Captions still legible at 100% on screen

5 · Test a Second Context

- [ ] Undergrad: pairing tested on a resume or CV page and on placeholder text
- [ ] Grad: pairing tested on your title and section pages
- [ ] Pairing matches the tone of the project's argument (grads: the Red Thread from Session 03)

6 · Before You Leave

- [ ] One change from tonight's portfolio reviews written down
- [ ] Styles saved in the file so the pairing can roll across every spread
- [ ] Two candidate title-page treatments started for the assignment

Due Thursday, Oct 22: your typeface system applied across every spread through the paragraph styles, plus two candidate title-page treatments. Submit the .indd and a PDF.
